CubanEden

Lead Developer | 2016 – 2020

- Creation of a web platform for managing tourist services in Cuba.
- Development of an admin panel, owner profiles, and client interface.
- Technical integrations: calendar synchronization with Airbnb, payments via Stripe.
- Use of PHP, Bootstrap, MaterializeCSS, MySQL.

Side Projects:

- Sales management system for an office supply business (PHP)
- Desktop application for DialUp connections in C#.

Agency for Research and Development Applied to Geomatics - Geocuba Pinar del Río

Software Developer | 2008 – 2016

- Development of a platform for web applications using PHP and ExtJs v3.
- Creation of a geographic information visualization system integrated with MapServer, Apache, and Postgres/PostGIS/PgRouting.
- Experience with GIS tools such as MapInfo, QuantumGIS, and gvSIG.
- Participation in scientific publications on data mining applied to geography:
 - **Design and Implementation of a Data Mining Tool for the Cartographic Visualization of Spatial Association Rules (VCMD-RAE)**
[View article](#)
 - **gvSIG-WEKA: A Data Mining Tool Integrated into a GIS for Processing Geographic Cadastral Data**
[View article](#)

PERSONAL PROJECTS

- **Arkit:** Web application development platform based on PHP.
[View on GitHub](#)
- **Christian Match:** Collection of Christian games for local churches, developed in C#.
[View on GitHub](#)
- **PhotoEstudio:** Website for promoting a photography studio. Includes an admin panel. Developed in NestJs and React.
[View on GitHub](#)
- **Pekelín:** Website for selling children's clothing. Includes an admin panel. Developed in NestJs and React.
[View on GitHub](#)

CURRENT UPGRADES

Studying and practicing the **Node.js** ecosystem: React, NestJS, Express, TailwindCSS.

TECHNICAL SKILLS

- **Languages and Frameworks:**
C#, C++, PHP, JavaScript, React, NestJS, Express, HTML, CSS, ExtJs.
- **Databases:**
MySQL, PostgreSQL, PostGIS
- **Maps and Geographic Systems:**
MapServer, Google Maps API, MapInfo, QuantumGIS, gvSIG
- **Other Technologies:**
Bootstrap, MaterializeCSS, TailwindCSS, Git, GitHub, AMP, Payment platforms API
